30-Year Experiment Shows Evolution in Slow Motion | In 1988, toxic algae wiped out a population of rough periwinkle sea snails in Sweden. An ecologist re-introduced 700 snails of a different ecotype in 1992. Over 30 years, the

colonists evolved down a strikingly similar pathway to their predecessors

Weight loss using GLP-1 drugs such as semaglutide (Ozempic) can cause huge muscle loss - Rapid weight loss can cause a greater loss of muscle mass than losing weight slowly. Low muscle mass is associated with decreased immunity, increased risk of infections, poor wound healing and shorter survival.
